Notes:

Proportional Control Output:
When specified with proportional control output note that "P" only control is available; Integral & Derivative are not offered [full PID]. If full PID and/or Auto Tune features are required refer to the Microprocessor based control [300](#), [100](#) and/or [C](#) Series.

Manual Reset Adjustment for Proportional Control Output:
A reset pot for adjusting proportional band is provided on all controls regardless if control is ordered as On-Off or Proportional; exceptions are the Models 901/902 & 401/402. A manual reset pot is only provided on these controls when ordered with Proportional control output.

On-Off and Proportional Control Output:
Controls ordered with Relay output may be field configured for On-Off or Time Proportioning Output [requires soldering]

Controls ordered with Relay output may have hardware modified to change Relay to Linear Proportional Outputs. [requires soldering output module or relay to replace original components.]

Differences — 901/401 and 902/402:
The 902/402 offer High/Low deviation LED indicators. When PV is within "x" % of Range of SP, LED operation is as follows:

- PV within 1-5% of range of SP both LEDs ON
- PV within 1% of range of SP both LEDs OFF
- PV greater than 5% of range of SP, both LEDs will flash.

Notes:

Minimum order quantity of 25 units of the same part# per release is required.

Model with on/off SPST 30 Amp Relay Control Output:

- Hysteresis fixed approx. 2 to 3 degrees F.
- Control Action:
 - Standard open on Rise [heating]
 - Optional Close on Rise [cooling]

Models with Proportional Time Proportioning Output:

- Proportional Band is fixed at 2% of span.
- Time Proportioning Cycle Time is fixed at 15 seconds
- Consult factory for custom Proportional Band and/or Cycle times.

Consult Factory for additional power, voltage inputs & temperature ranges.

Refer to Series 8 Sales brochure & manual for specifications.

Notes:

Models with Latching or on/off output (20 Amp Relay output [SPDT]):

- Hysteresis is 0.5% of range
- Output is latching as standard.
- Output is non-latching [on/off] when terminals 12 & 13 are shorted.

Models with Proportional Time Proportioning Output (20 Amp Relay output [SPDT]):

- Proportional Band is fixed at 2.5% of span.
- Time Proportioning Cycle Time is fixed at 20 seconds
- Consult factory for custom Proportional Band and/or Cycle times.

New Temperature Ranges have a NRE charge of \$150.00 net.

Minimum order for unit with a new Order Code is 25 units. A new Order Code is required for:

- New temperature range
- Existing range with a different input type
- Input Power change for existing range & input type.

Product Notes:

Limit Control Output [5A SPDT Relay]:

- Setpoint Accuracy typically +/- 3.0% of scale
- Hysteresis is 0.5% of range
- Latching output is standard
- Remote Reset is standard

New Temperature Ranges have a NRE charge of \$150.00 net.

Minimum order for unit with a new Order Code is 25 units. A new Order Code is required for:

- New temperature range
- Existing range with a different input type
- Input Power change for existing range & input type.

Notes:

- Inputs #1 & 2 for both the ink & thermal recorder models share a common ground; isolated sensors are required (t/c inputs use ungrounded junctions)
- Thermal print recorder is configurable for single or dual channels via the front keypad. Two programmable inputs are standard on the thermal recorder.
- Not available on single pen ink model.
- Display:
 Decimal point: none is standard; consult factory for 1 DP
 Display Range Ink: same as configured chart range (Pen 1)
 -Consult factory if pen 2 must be different than pen 1
 Display Range Thermal: same as configured chart range per pen
- Thermal Recorder: real time clock is standard, battery back up is not available. Order code "0" is required.
- Ink Recorder Optional Battery Backup provides up to 48 hours of continuous recording on ink style recorders without display; with display 24 hours of continuous recorder operation.

[Non-cataloged options - click here](#)

- Private Branding, Low Voltage power input, Transmitter Power Supply, 0-1VDC process input, special chart rotation, buzzers, etc.

UL & CE: The one & two pen Ink recorders are UL & CE; the Thermal print recorder is not UL Listed or been tested for CE compliance. Certain non-catalog options do not allow for UL label.

PR Series IO Expansion Slots:

PR Series expansion slots will accept input or output card combinations based upon the model part number matrix. Below is description of each module type that may be inserted into a PR expansion slot.

- AI = 3 or 6 Analog Input
- DI = 8-Digital Input*
- RO = 9-Relay Output*
- AO = 6-Analog Output (PV Retransmission)
- * A combination DI/DO module is available with 3-DI & 3-DO each but for this document is not specified as an RO type.

PR30 has 16-slots.

- AI modules may be inserted into slots 1-8 supporting up to 48 AI-channels (6AI/module).
- DI/RO/AO modules may be inserted after AI cards in any open slots ranging from 2-16.

PR Series IO Expansion Slots:

PR Series expansion slots will accept input or output card combinations based upon the model part number matrix. Below is description of each module type that may be inserted into a PR expansion slot.

- AI = 3 or 6 Analog Input
- DI = 8-Digital Input*
- RO = 9-Relay Output*
- AO = 6-Analog Output (PV Retransmission)

* A combination DI/RO module is available with 3-DI & 3-RO each but for this document is not specified as an IO type.

PR Series Module Slot Usage per Model

PR10 has 4 slots:

- The first 3 slots are active; slot 4 is not used.
- Slot 1 accepts 3 or 6 channel AI
- Slots 2 & 3 used for DI/RO modules.

PR20 has 4 slots:

- Depending upon the number of AI specified in the matrix
- Slots 1, 2, 3, & 4 may be used in sequential order for combinations of 3, 6, 12, 18 & 24 AI with the latter consuming all 4-slots.
- Any remaining open slots may be used for DI, RO & AO modules.

PR30 has 16-slots.

- AI modules may be inserted into slots 1-8 supporting up to 48 AI-channels (6AI/module).
- DI/RO/AO modules may be inserted after AI cards in any open slots ranging from 2-16.

PC Software

-Observer software is standard with each recorder. PR-Data Acquisition Studio Software is optional.

SD Cards - (may be ordered separately)

- 7: 7 A-IO cards FC4A-L03A1 (4-20mA or 0-10VDC IO) \$1,875**

Note: each I/O card has qty 2 Remote Setpoint input and qty 1 Retransmission output configurable for PV,SP or %Out

8. Serial Communication (note 1) (DIN Rail Mount - plug into CM)

- 0: None N/C**
- 1: FC5A-SIF4: (RS485 Modbus RTU port (slave))* (port 3) \$270**
- 2: FC5A-SIF2: (RS232 port for Barcode Reader) ** \$540**

Note: If Item 2 is specified Item 1 must be supplied & counted in the total number of modules - see Expansion Module below

* RS485 Modbus RTU port allows R/W by FDC EnVision & 3rd party software.

**Bar Code Reader input is compatible for serial based barcode readers. System will accept up to 16 characters of data from the bar code scanner. Data from the bar code reader will be inserted as operator events in the Historical Data File; there is no limit to the number of events that may be entered manually or with a bar code scanner.

LAN Accessories

Controls may be connected to PC based data acquisition and/or SCADA software such as Future Design Controls MultiView software [free] and/or other 3rd party PC based software solutions.

RS232-485 Gateway

Typically required when connecting controls to a PC's RS232 port via the PC's serial port (9-pin connection) or to a PC's USB port.

PC Serial or USB Connection: Model SN10A Gateway

Model SN10A RS232 to RS485 Gateway

Model: SNA10A \$145.00

Serial Cable to connect SNA10A to PC serial port

(9-pin connection to PC serial port & SN10A; 6 ft cable)
 Model: DB9M-DB9F-6ft \$20.00

USB to Serial Converter (if PC does not have a Serial Port)

Model: USB-Serial-Cable \$35.00

Direct USB to RS232 to RS485 Gateway

One part number and two components providing a USB RS232 to 485 Gateway connection. This model does not require the Serial 9-pin cable (uses USB port) and includes the USB cable

Model: Uport@ 1150 (Schedule C) \$149.00

Model: Uport@ 11511 (Schedule C) \$189.00
 (11511 offers 2KV optical isolation)

Gateway: Model PC-E Serial Modbus RTU to Ethernet TCP/IP Modbus.

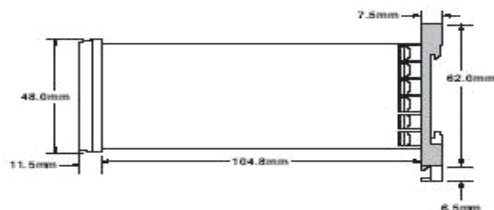

The PC-E is an interface to bridge Serial Modbus devices to computer hosts running Modbus TCP/IP on Ethernet networks

Model: PC-E Price

NOTES

WARRANTY & RETURN STATEMENT

Warranty:

Future Design Controls products described in this brochure are warranted to be free from functional defects in materials and workmanship at the time the products leave Future Design Controls facilities and to conform at that time to the specifications set forth in the relevant Future Design Controls manual, sheet or sheets for the time period specified in their respective product manuals after delivery to the first purchaser for use. If there is no warranty statement or time period stated in a product's respective product manual the Warranty period is one year.

There are no expressed or implied Warranties extending beyond the Warranties herein and above set forth.

Limitations

Future Design Controls provides no warranty or representations of any sort regarding the fitness of use or application of its products by the purchaser. Users are responsible for the selection, suitability of the products for their application or use of Future Design Controls products.

Future Design Controls shall not be liable for any damages or losses, whether direct, indirect, incidental, special, consequential or any other damages, costs or expenses excepting only the cost or expense of repair or replacement of Future Design Control products as described below.

Future Design Controls sole responsibility under the warranty, at Future Design Controls option, is limited to replacement or repair, free of charge, or refund of purchase price within the warranty period specified. This warranty does not apply to damage resulting from transportation, alteration, misuse or abuse.

Future Design Controls reserves the right to make changes without notification to purchaser to materials or processing that do not affect compliance with any applicable specifications.

Return Material Authorization:

Contact Future Design Controls for Return Material Authorization Number prior to returning any product to our facility.
