Schedule D

The 2 pen OEM recorder has been designed specifically for "OEM'S" where pen 2 is used to record humidity or other process sensors that have an analog output.

Pen 2 input is not configurable and dependent upon its' part number is fixed at 4-20mA/1-5VDC or 0-5VDC only.

Pen 2 does not have a programmable chart range and is fixed at 0 to 100% of the chart.

Applications that require a programmable input on pen 2 should use the standard DR5000 on page 16 of the Price Sheet.

**Ink Style Recorder Charts (Schedule D)**

Standard Charts:  
 Contact Customer Service for available chart ranges & rotations: [DR Available Chart Listing.pdf](#)
