**LAN Gateways & Converters**

**Gateway: RS232 to RS485 Converters**

Typically required when connecting controls to a PC's RS232 port via the PC's serial port (9-pin connection) or to a PC's USB port.

**PC Serial or USB Connection: Model SN10A Converter**

<u>Model SN10A RS232 to RS485 Gateway</u>	<u>Price</u>
Model: SNA10A (Schedule A)	\$145.00

**Serial Cable to connect SNA10A to PC serial port**

<u>Serial Cable to connect SNA10A to PC serial port</u>	<u>Price</u>
(9-pin connection to PC serial port & SN10A; 6 ft cable) Model: DB9M-DB9F-6ft (Schedule C)	\$20.00

**USB to Serial Converter (if PC does not have a Serial Port)**

Model: USB-Serial-Cable (Schedule C)	\$35.00
--------------------------------------	---------

**Direct USB to RS232 to RS485 Converter**

One part number and two components providing a USB RS232 to 485 Gateway connection. This model does not require the Serial 9-pin cable (uses USB port) and includes the USB cable

<u>Model</u>	<u>Price</u>
Model: Uport 1150 (Schedule C)	\$149.00
Model: Uport 1150I (2KV optical isolation) (Schedule C)	\$189.00

**Gateway: Model PC-E Serial Modbus RTU to Ethernet TCP/IP Modbus.**

The PC-E is an interface to bridge Serial Modbus devices to computer hosts running Modbus TCP/IP on Ethernet networks

<u>Model</u>	<u>Price</u>
Model: PC-E	\$299.00

**Gateway: Model PC-W Wireless Ethernet & Serial**

The PC-W is a bridge between Serial RS232, 485 & Ethernet based devices and one Ethernet device to easily connect to a wireless router/switch and LAN.

<u>Model</u>	<u>Price</u>
Model: PC-W	\$425.00
